SKILLS

- SQL (Advanced Querying, Window Functions, CTEs, Data Analysis)
- Python (Pandas, Seaborn, Data Cleaning, Automation, Data Wrangling)
- Power BI (DAX, Data Modeling, Interactive Dashboards, Reporting)
- Excel (Pivot Tables, Power Query, Data Analysis, Dashboards)
- Data Analysis (EDA, Reporting, Insights)
- Git Version Control

PROJECTS

Game Graphics Performance Analysis: The Cost of Visual Fidelity

- Analyzed 72 benchmark runs across 4 AAA games to evaluate FPS stability, GPU utilization, CPU load, and thermal performance, quantifying tradeoffs between performance and graphical fidelity
- Processed and aggregated HWINFO telemetry using **Python** (Pandas) to structure and normalize performance datasets for exploratory and comparative analysis
- Built a relational data model and interactive **Power BI** dashboard using **SQL** and DAX to visualize system performance metrics and identify graphics preset efficiency and optimization opportunities

Movie Performance & ROI Analysis: From Budget to Blockbuster

- Cleaned and transformed a raw Kaggle movie dataset using **Excel Power Query**, handling missing values, inconsistent formatting, and structural data quality issues
- Performed exploratory data analysis on budget, revenue, popularity, and ROI to identify trends in profitability, country-level production concentration, and engagement vs financial performance
- Developed an interactive **Excel** dashboard using pivot tables and pivot charts to visualize key performance metrics across countries, budgets, and popularity rankings

EMPLOYMENT

Clinical Research Coordinator

April 2025 – September 2025

Intermountain Health

Murray, UT

- Collected, entered, and maintained clinical data across REDCap, EPIC, and iCentra EMR systems following GDP and ALCOA-C standards
- Maintained regulatory research records in compliance with federal regulations, institutional policies, and FDA Good Clinical Practice
- Recruited and Consented patients across registry, observational, and biospecimen studies
- Coordinated study procedures and communicated updates with investigators and regulatory teams
- Exceeded recruitment targets for diabetes prevention program survey study

Lead Laboratory Technician

November 2020 – September 2024

Laboratory Animal Resource Center

Provo, UT

- Supervised a team of 12 lab technicians and trained 20+ staff in standardized lab procedures
- Developed and updated SOPs to ensure compliance with regulatory and institutional requirements
- Maintained animal health and behavioral records and managed care documentation systems
- Collaborated with veterinarians and investigators to improve research quality and animal care
- Optimized equipment maintenance procedures and performed routine husbandry and facility upkeep

EDUCATION

Bachelor of Science in Biology

September 2019 – August 2024

Brigham Young University

Provo, Utah
