

BRANDON ANDERSON

Orem, UT | (385) 539-0840 | brandon.anderson.career@gmail.com
[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SKILLS

Languages & Querying: SQL (joins, CTEs, window functions, subqueries), Python (pandas, requests, JSON)

Data Engineering: PostgreSQL, relational and dimensional modeling, ETL/ELT pipelines, REST APIs, data validation, Git/GitHub, Linux/WSL

Analytics & Visualization: Power BI, DAX, Power Query, Excel

PROJECTS

Steam Deal Analytics Pipeline | Python, PostgreSQL, REST API | In Progress

- Designing a PostgreSQL operational model for games, stores, deal observations, and pipeline runs, including foreign keys, CHECK constraints, and run-level audit fields
- Developing a repeatable CheapShark API ingestion workflow to collect, validate, and load historical deal observations while tracking extraction and load status
- Building an end-to-end ELT pipeline using Python, PostgreSQL, Git, and cloud storage practices to support automated data ingestion and downstream analysis

Game Graphics Performance Analysis: The Cost of Visual Fidelity | SQL, Python, Power BI

- Analyzed 72 benchmark runs across 4 AAA games to quantify performance tradeoffs between graphics quality, FPS stability, GPU utilization, and thermal performance
- Built a relational data model and interactive Power BI dashboard using DAX to identify graphics preset efficiency and communicate optimization insights

Movie Performance & ROI Analysis: From Budget to Blockbuster | Excel Power Query

- Cleaned and transformed 45,000+ movie records using Excel Power Query, resolving missing values, inconsistent formatting, and data quality issues
- Performed exploratory data analysis and built an interactive Excel dashboard to evaluate relationships among budgets, revenue, popularity, ROI, and production trends

EMPLOYMENT

Clinical Research Coordinator

April 2025 – September 2025

Intermountain Health

Murray, UT

- Collected, validated, and maintained clinical data across REDCap, EPIC, and iCentra EMR systems while following GDP and ALCOA-C standards
- Maintained regulatory research records in compliance with federal regulations, institutional policies, and FDA Good Clinical Practice
- Recruited and consented patients across registry, observational, and biospecimen studies
- Coordinated study procedures and communicated updates with investigators and regulatory teams

Lead Laboratory Technician

November 2020 – September 2024

Laboratory Animal Resource Center

Provo, UT

- Supervised a team of 12 lab technicians and trained 20+ staff in standardized lab procedures
- Developed and updated SOPs to ensure compliance with regulatory and institutional requirements
- Maintained animal health and behavioral records and managed care documentation systems
- Collaborated with veterinarians and investigators to improve research quality and animal care
- Optimized equipment maintenance procedures and performed routine husbandry and facility upkeep

EDUCATION

Bachelor of Science in Biology

September 2019 – August 2024

Brigham Young University

Provo, Utah
