SKILLS

Programming & Querying: SQL (joins, CTEs, window functions, subqueries), Python (pandas, requests, JSON)

Data Engineering: PostgreSQL, ETL/ELT pipelines, REST APIs, relational modeling, dimensional modeling, data validation, Git/GitHub, Linux/WSL

Analytics & Visualization: Power BI, DAX, Power Query, Excel

PROJECTS

Steam Deal Analytics Pipeline | Python, PostgreSQL, REST API

- Designed a PostgreSQL operational schema containing games, stores, deal observations, and pipeline audit tables
- Built a Python ingestion workflow that extracts Steam deal data from the CheapShark API and validates incoming records
- Built an end-to-end ELT pipeline in Python that loads validated data into PostgreSQL for downstream analysis

The Cost of Visual Fidelity | SQL, Python, Power BI

- Analyzed 72 benchmark runs across 4 AAA games to quantify the impact of graphics settings on FPS stability, GPU utilization, and thermal performance
- Designed a relational database and interactive Power BI dashboard using DAX to identify graphics preset efficiency and communicate performance tradeoffs

From Budget to Blockbuster | Excel, Power Query

- Cleaned and transformed 45,000+ movie records by resolving missing values, inconsistent formatting, and other data quality issues
- Built an interactive Excel dashboard to analyze relationships among budget, revenue, popularity, ROI, and production trends

EMPLOYMENT

Clinical Research Coordinator

April 2025 – September 2025

Intermountain Health

Murray, Utah

- Managed high-volume clinical research data across REDCap, EPIC, and iCentra while ensuring GDP and ALCOA-C compliance
- Maintained accurate regulatory documentation and research records in compliance with FDA Good Clinical Practice, federal regulations, and institutional policies
- Recruited and consented patients across registry, observational, and biospecimen studies
- Coordinated research activities and communicated study progress with investigators and regulatory teams

Lead Laboratory Technician

November 2020 – September 2024

Brigham Young University

Provo, Utah

- Supervised a team of 12 lab technicians and trained 20+ staff in standardized lab procedures
- Developed and updated dozens of SOPs to ensure compliance with regulatory and institutional requirements
- Maintained animal health, behavioral, and care records while ensuring accurate documentation
- Collaborated with veterinarians and investigators to improve research quality and animal care
- Improved equipment maintenance procedures to support reliable laboratory operations and regulatory compliance

EDUCATION

Bachelor of Science in Biology

September 2019 – August 2024

Brigham Young University

Provo, Utah
